

October 3, 2022

The Senior Management Team of AgriHub Inc is pleased to announce the transition of our Manitoba Grain Division from Penner Farm Services in Blumenort, MB to New Standard Ag in Winnipeg, MB. The Grain Division provides solutions in Drying, Handling, Milling, Storage, Controls and now also Pelleting. This transition will take effect immediately for Sales, while inventory and service will be transferred over from Blumenort to Winnipeg in the coming weeks. This transfer will be fully accomplished by November 1, 2022.

The NSA Grain team will consist of Travis Martens, transitioning from PFS-MB, bringing with him over 5 years of experience in the Grain & Milling division, along with decades of Poultry experience; Vince Jeanson, one of our newest members of the New Standard team, a Red Seal Electrician in his previous job; Kevin Kurbis, Sales Manager at New Standard Ag and Andrew Penner, the General Manager of New Standard Ag. Steve Klein, Director of Grain Solutions, will provide expert support, solutions design leadership and product knowledge to Travis and Vince, as well as the other Grain teams in the AgriHub Family of Companies.

The service team at New Standard Ag will be trained to handle grain service requests through the Fall of 2022. During the interim the PFS-MB Service team will continue to service the existing grain & milling customers.

Parts, Service and Equipment to Grain customers will now be offered from our Brandon and Winnipeg locations, with the main inventory for Grain being relocated from Blumenort to Winnipeg.

We thank our employees, customers, and suppliers for the support, trust and patience during both this transition, and day-to-day business. If you have any questions regarding this transition, please contact your local Grain Sales Rep.
